Subject index

Ab initio calculations,
neutral versus ionic interactions in ab initio chemisorption cluster model calculations: halogens on mercury (Blanco et al.) 243
Acetonitrile,
cathodic reduction of carbon dioxide in ———. An electrochemical and infrared spectroelectrochemical study (Desilvestro, Pons) 207
Ad-atoms,
electrocatalysis by ———. Part XXV. Electrocatalytic effects on the elementary steps in ethanol oxidation by non-oxygen-adsorbing ad-atoms (Shibata et al.) 163

1,1′-Bis(*p*-cyanophenyl)-4,4′-bipyridilium,
ESR study of the comproportionation of ——— (cyanophenyl paraquat) in propylene carbonate (Compton et al.) 309
2-(-5′-Bromo-2′-pyridylazo)-5-diethylaminophenol,
study on the adsorption voltammetry of the iron(III)–——— system (Jingzhong Zhao, Wenrui Jin) 271

Calcium,
electrode reactions at extremely negative potentials. Part IV. Kinetics and thermodynamics of the Ca(II)/Ca(Hg) system in water (Chlistunoff, Galus) 105
Carbon dioxide,
cathodic reduction of ——— in acetonitrile. An electrochemical and infrared spectroelectrochemical study (Desilvestro, Pons) 207
Cationic surfactant,
electrochemical behaviour of clay-modified electrodes in the presence of ——— (Brahimi et al.) 343
Clay-modified electrodes,
electrochemical behaviour of ——— in the presence of cationic surfactant (Brahimi et al.) 343
Cluster model,
neutral versus ionic interactions in ab initio chemisorption ——— calculations: halogens on mercury (Blanco et al.) 243
Cold fusion,
observations on the surface composition of palladium cathodes after D_2O electrolysis in LiOD solutions (Mebrahtu et al.) 351
Conformal map,
microdisk electrodes. Part I. Digital simulation with a ——— (Michael et al.) 33
Copper,
reduction of ———(II) complexes of histidine and histidyl peptides at mercury electrodes (Bilewicz) 231
Cross reaction,
isopotential points as a function of an allowed ——— (Fitch, Edens) 1
Cryo-electrochemistry,
———: new observations (Gosser, Qingdong Huang) 333
Cyanophenyl paraquat,
ESR study of the comproportionation of 1,1′-bis(*p*-cyanophenyl)-4,4′-bipyridilium (———) in propylene carbonate (Compton et al.) 309
Cyclodextrins,
the influence of α-, β- and γ-——— on the kinetics of the electrode reactions in 1 *M* $NaClO_4$ and 0.5 *M* Na_2SO_4 aqueous solutions (Golędzinowski) 171

Decithienyl oligomers,
electrochemical synthesis of alpha-conjugated octi- and ——— (Xu et al.) 339
Digital simulation,
microdisk electrodes. Part I. ——— with a conformal map (Michael et al.) 33
Dimethyl sulphoxide,
use of microelectrodes for studying the process involved in 1-naphthylamine oxidation in ——— (Daniele et al.) 129

Electrode kinetics,
——— and the superconducting state (Bockris, Wass) 329
Electrolytically generated bubbles,
detection of ——— using an electrochemical quartz crystal microbalance (Carr et al.) 313
Electron transfer,
detection of electroactive transient intermediates of electrochemical reactions by steady state and time-dependent techniques. Competition between heterogeneous ——— and homogeneous chemical reactions (Andrieux, Savéant) 15
Homogeneous redox catalysis of a heterogeneous ——— reaction (Gilicinski, Evans) 93
Enzyme cascade,
homogeneous amperometric ligand-binding assay amplified by a proteolytic ——— (Di Gleria et al.) 83
Ethanol,
electrocatalysis by ad-atoms. Part XXV. Electrocatalytic effects on the elementary steps in ——— oxidation by non-oxygen-adsorbing ad-atoms (Shibata et al.) 163

Formaldehyde,
oxidation of methanol, ——— and formic acid by vanadium(IV) ions in sulphuric acid (Folkesson et al.) 149
Formic acid,
oxidation of methanol, formaldehyde and ——— by vanadium(IV) ions in sulphuric acid (Folkesson et al.) 149

Glassy carbon,
surface injection catalysis at ——— electrodes (Smyrl et al.) 67

Halogens,
neutral versus ionic interactions in ab initio chemisorption cluster model calculations: ——— on mercury (Blanco et al.) 243
Heavy water,
observations on the surface composition of palladium cathodes after ——— electrolysis in LiOD solutions (Mebrahtu et al.) 351
Hexacyanoferrate,
polynuclear transition metal ——— films. In-situ electrochemical determination of their composition (Kulesza, Galus) 117
Histidine,
reduction of Cu(II) complexes of ——— and histidyl peptides at mercury electrodes (Bilewicz) 231
Histidyl peptides,
reduction of Cu(II) complexes of histidine and ——— at mercury electrodes (Bilewicz) 231
Hydrochloric acid,
influence of the structural state on the anodic dissolution of TA_6V alloy in concentrated ———. Handling the results to study the anodic behaviour of welded elements (Priem et al.) 251
Hydrogen,
formation of uranous nitrate using ———–uranyl local cells (Furuya, Shibata) 321

Interdigitated array electrodes,
fabrication and characteristics of vertically separated ——— (Niwa et al.) 291
Iron,
study on the adsorption voltammetry of the ——— (III)–2-(-5′-bromo-2′-pyridylazo)-5-diethylaminophenol system (Jingzhong Zhao, Wenrui Jin) 271
Isonicotinamide,
study of the reduction mechanism of ——— on mercury electrodes (Rodríguez Mellado, Marín Galvín) 221
Isopotential points,
——— as a function of an allowed cross reaction (Fitch, Edens) 1

Ligand-binding assay,
homogeneous amperometric ——— amplified by a proteolytic enzyme cascade (Di Gleria et al.) 83
Lithium deuteroxide,
observations on the surface composition of palladium cathodes after D_2O electrolysis in ——— solutions (Mebrahtu et al.) 351
Luggin capillary,
influence of the ——— on the response time of a reference electrode (Botter, Jr. et al.) 279

Mechanical surface renewal,
underpotential anodic dissolution of noble metals during the continuous mechanical renewal of their surface (Noninski) 287

Mercury,
Electrode reactions at extremely negative potentials. Part IV. Kinetics and thermodynamics of the Ca(II)/Ca(Hg) system in water (Chlistunoff, Galus) 105
Neutral versus ionic interactions in ab initio chemisorption cluster model calculations: halogens on ——— (Blanco et al.) 243
Reduction of Cu(II) complexes of histidine and histidyl peptides at ——— electrodes (Bilewicz) 231
Study of the reduction mechanism of isonicotinamide on ——— electrodes (Rodríguez Mellado, Marín Galvín) 221
Methanol,
oxidation of ———, formaldehyde and formic acid by vanadium(IV) ions in sulphuric acid (Folkesson et al.) 149
Microdisk electrodes,
chronoamperometric response to potentiostatic doping at polypyrrole-coated ——— (Aoki, Tezuka) 55
Detection of a steady-state current diverging from a point source by means of a potentiostated ——— (Aoki, Sakai) 47
———. Part I. Digital simulation with a conformal map (Michael et al.) 33
Microelectrodes,
use of ——— for studying the process involved in 1-naphthylamine oxidation in dimethyl sulphoxide (Daniele et al.) 129

1-Naphthylamine,
use of microelectrodes for studying the process involved in ——— oxidation in dimethyl sulphoxide (Daniele et al.) 129
Noble metals,
underpotential anodic dissolution of ——— during the continuous mechanical renewal of their surface (Noninski) 287
Nuclear fusion,
observations on the surface composition of palladium cathodes after D_2O electrolysis in LiOD solutions (Mebrahtu et al.) 351

Octithienyl oligomers,
electrochemical synthesis of alpha-conjugated ——— and decithienyl oligomers (Xu et al.) 339

Palladium,
observations on the surface composition of ——— cathodes after D_2O electrolysis in LiOD solutions (Mebrahtu et al.) 351
Platinum,
growth modes of ——— overlayers resulting from square wave perturbing potential treatments of different symmetries (Visintin et al.) 191
Polypyrrole,
anodic release of anions from ——— (Beck et al.) 141
Chronoamperometric response to potentiostatic doping at ———-coated microdisk electrodes (Aoki, Tezuka) 55
Potentiostatic doping,
chronoamperometric response to ——— at polypyrrole-coated microdisk electrodes (Aoki, Tezuka) 55
Propylene carbonate,
ESR study of the comproportionation of 1,1′-bis(*p*-cyanophenyl)-4,4′-bipyridilium (cyanophenyl paraquat) in ——— (Compton et al.) 309
Proteolytic enzyme cascade,
homogeneous amperometric ligand-binding assay amplified by a ——— (Di Gleria et al.) 83
Proton tunneling,
——— at 150 K (Bockris, Wass) 325

Quartz crystal microbalance,
detection of electrolytically generated bubbles using an electrochemical ——— (Carr et al.) 313

Response time,
influence of the Luggin capillary on the ——— of a reference electrode (Botter, Jr. et al.) 279

Scanning reaction microscopy,
——— of electrochemical interfaces (Kuznetsov) 299
Sodium perchlorate,
the influence of α-, β- and γ-cyclodextrins on the kinetics of the electrode reactions in 1 *M* ——— and 0.5 *M* Na_2SO_4 aqueous solutions (Gołędzinowski) 171
Sodium sulphate,
the influence of α-, β- and γ-cyclodextrins on the kinetics of the electrode reactions in 1 *M* $NaCPO_4$ and 0.5 *M* ——— aqueous solutions (Gołędzinowski) 171

Square wave perturbing potential,
growth modes of platinum overlayers resulting from ——— treatments of different symmetries (Visintin et al.) 191
Steady-state current,
detection of a ——— diverging from a point source by means of a potentiostated microdisk electrode (Aoki, Sakai) 47
Steady state techniques,
detection of electroactive transient intermediates of electrochemical reactions by ——— and time-dependent techniques. Competition between heterogeneous electron transfer and homogeneous chemical reactions (Andrieux, Savéant) 15
Sulphuric acid,
oxidation of methanol, formaldehyde and formic acid by vanadium(IV) ions in ——— (Folkesson et al.) 149
Superconducting state,
electrode kinetics and the ——— (Bockris, Wass) 329
Surface injection catalysis,
——— at glassy carbon electrodes (Smyrl et al.) 67

Tetramethyltetraselenafulvalene salts,
electrically conductive thin films of ———. Film preparation and electrical conductivity (Maruno et al.) 303
Time-dependent techniques,
detection of electroactive transient intermediates of electrochemical reactions by steady state and ———. Competition between heterogeneous electron transfer and homogeneous chemical reactions (Andrieux, Savéant) 15
Titanium alloys,
influence of the structural state on the anodic dissolution of TA_6V alloy in concentrated hydrochloric acid. Handling the results to study the anodic behaviour of welded elements (Priem et al.) 251
Transient intermediates,
detection of electroactive ——— of electrochemical reactions by steady state and time-dependent techniques. Competition between heterogeneous electron transfer and homogeneous chemical reactions (Andrieux, Savéant) 15
Transition metal,
polynuclear ——— hexacyanoferrate films. In-situ electrochemical determination of their composition (Kulesza, Galus) 117

Uranous nitrate,
formation of ——— using hydrogen–uranyl local cells (Furuya, Shibata) 321
Uranyl,
formation of uranous nitrate using hydrogen–——— local cells (Furuya, Shibata) 321

Vanadium,
oxidation of methanol, formaldehyde and formic acid by ———(IV) ions in sulphuric acid (Folkesson et al.) 149
Vertically separated interdigitated array electrodes,
fabrication and characteristics of ——— (Niwa et al.) 291

Welded elements,
influence of the structural state on the anodic dissolution of TA_6V alloy in concentrated hydrochloric acid. Handling the results to study the anodic behaviour of ——— (Priem et al.) 251
